Operation

We supply the market with proven high-end drone solutions

- One of the leading European providers of drone solutions to the energy, maritime and governmental market
- Founded in 2014
- 12 employees, 20 employees by Q1 2019
- Signed contacts YTD in 2018 – over 200 mill NOK
- Located in Sandnes, Norway

WITHOUT A LOT OF CASH – DRONE INDUSTRY STOPS

- Investments in 2017 over 1 billion USD
- Estimated to be over 3000 drone startups globally
- Estimated that only 200 of these works with cutting edge tech
- Estimated that ONLY 10-15 of the startups has a value of more than 10 million USD

SO, who are the 2800??? And who will bring the cash??

The impact of drones on the UK economy

Skies without limits

A look at how drones will impact the UK's economy, jobs, productivity and quality of life

£42bn

Net impact on the economy by 2030

£16bn

Net cost savings from uptake of drone technologies

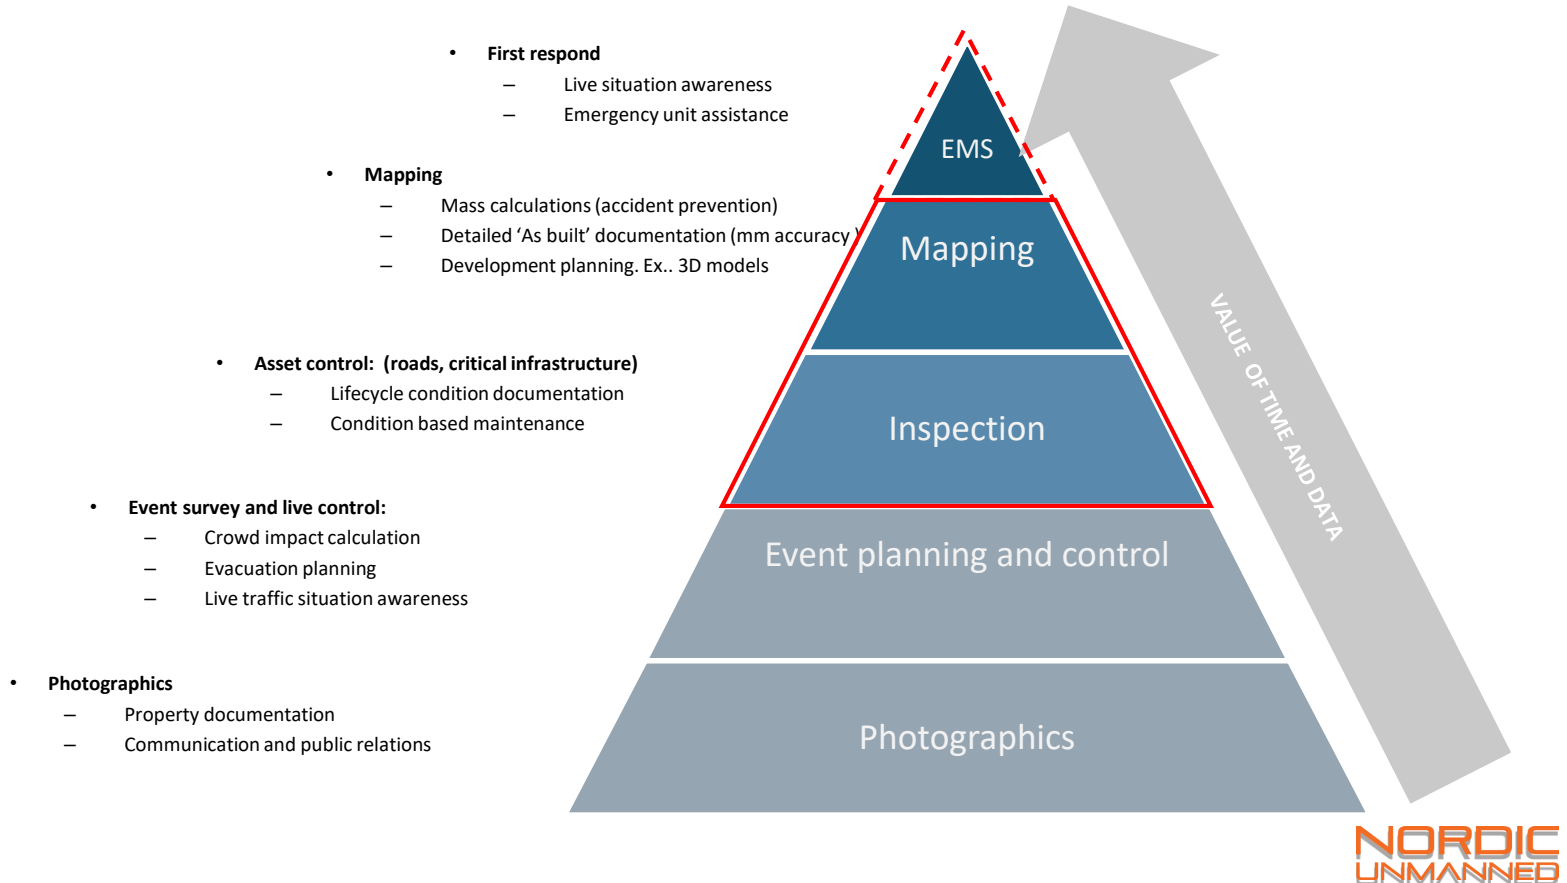

76,000

drones in use across UK skies by 2030

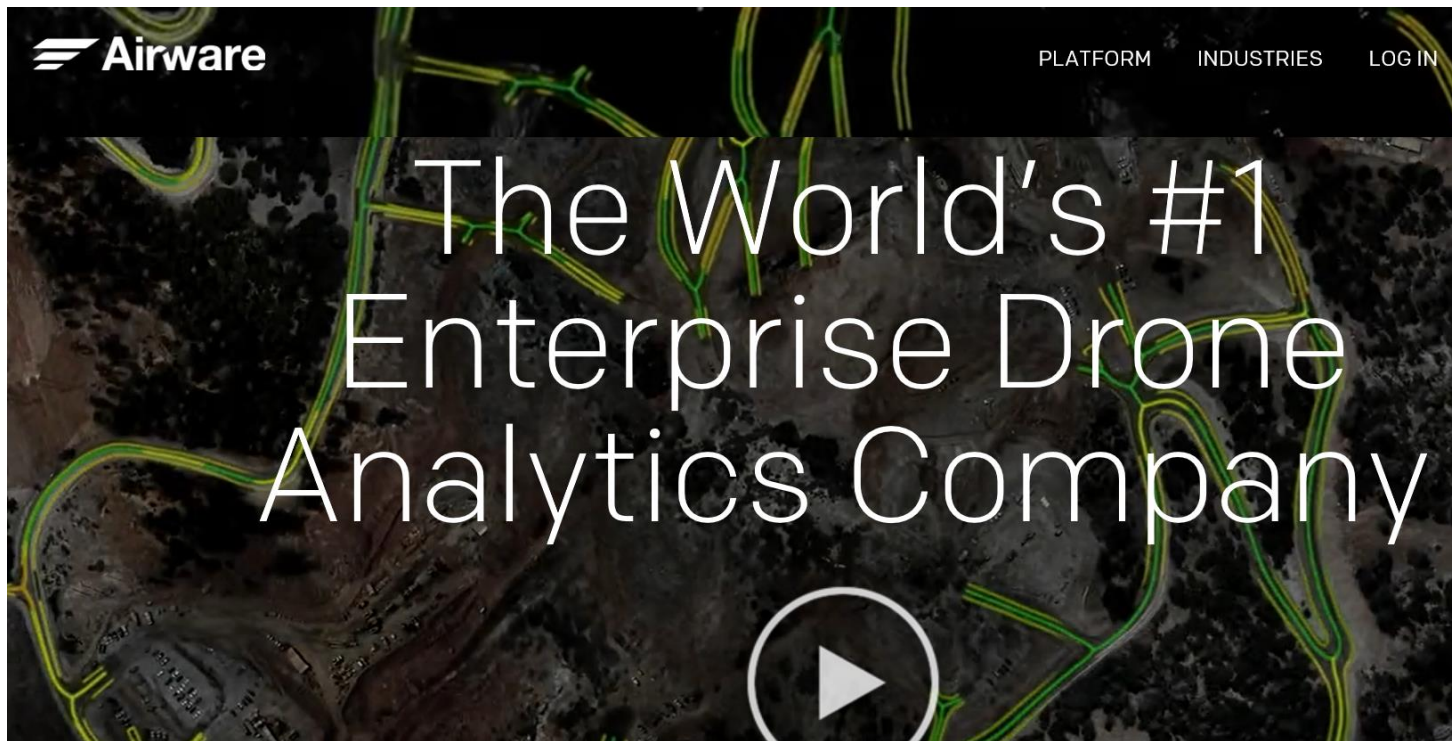

Disruption we have seen before?

The full (potential) value created by Drones

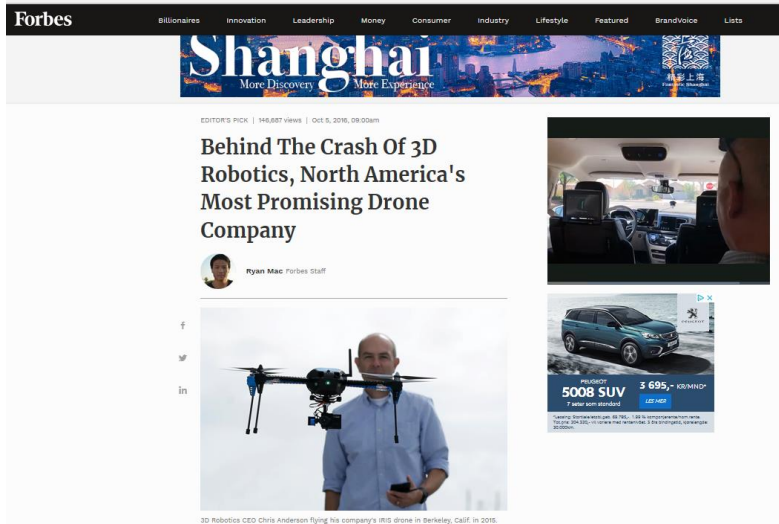

- \$ 118 mill
- 140 employees
- Andreessen Horowitz, Google GV, Kleiner Perkins, GE Venture
- Silicon Vally

Drone startup Airware crashes, shuts down after burning \$118M

NorSea Wind to Use Nordic Unmanned Drones for HVDC Platform Inspections

Image source: NorSea Group

NorSea Wind (NorSeaGroup Wind) has signed a five-year agreement with Nordic Unmanned (NU) for the provision of drone services for the works on nine TenneT's HVDC platforms, for which NorSea Wind won a five-year contract **earlier this year**.

"It is very exciting for us to be a part of this visionary technology implementation. I believe the size and length of this contract is the first of its kind in European terms," said Nordic Unmanned's CEO Knut Roar Wlig.

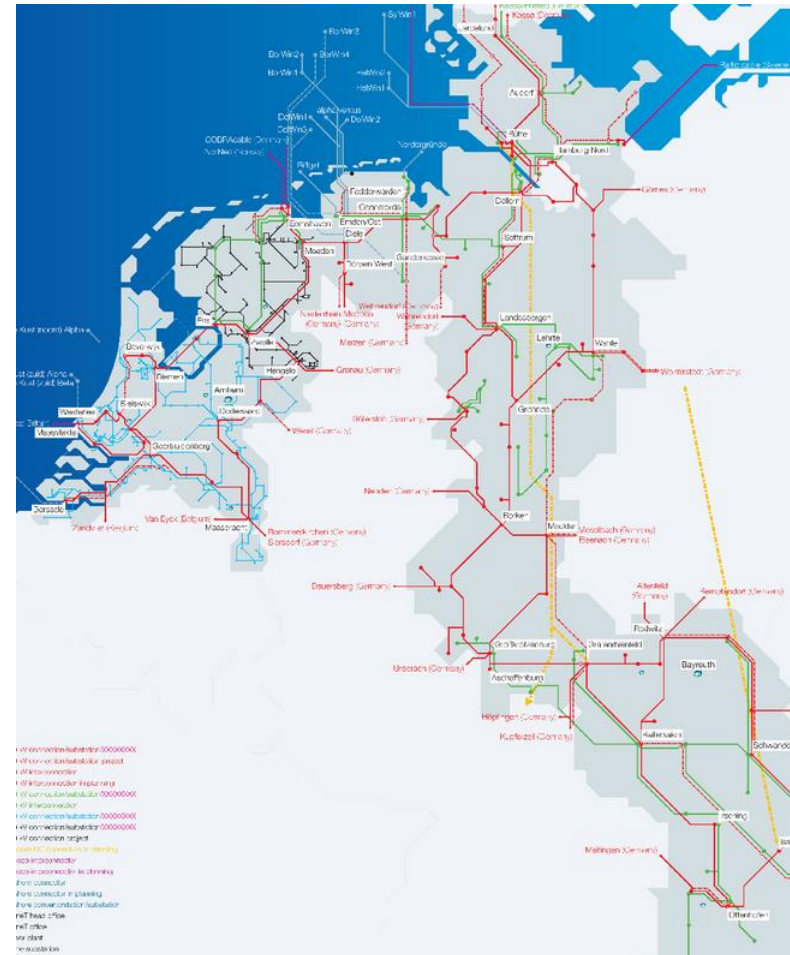

Nordic Unmanned, a Norwegian provider of unmanned systems and sensor technology, will produce full digitalization of the nine platform structures with the use of their drones, covering drone operations for the inspection of the platforms
