## Implementation report

Kontrakt mellom - Roman Gramsz og Miljøvernavdelingen, Fylkesmannen i Oslo og Akershus

Av 30.08.2018

Saksnummer: 2018/17613

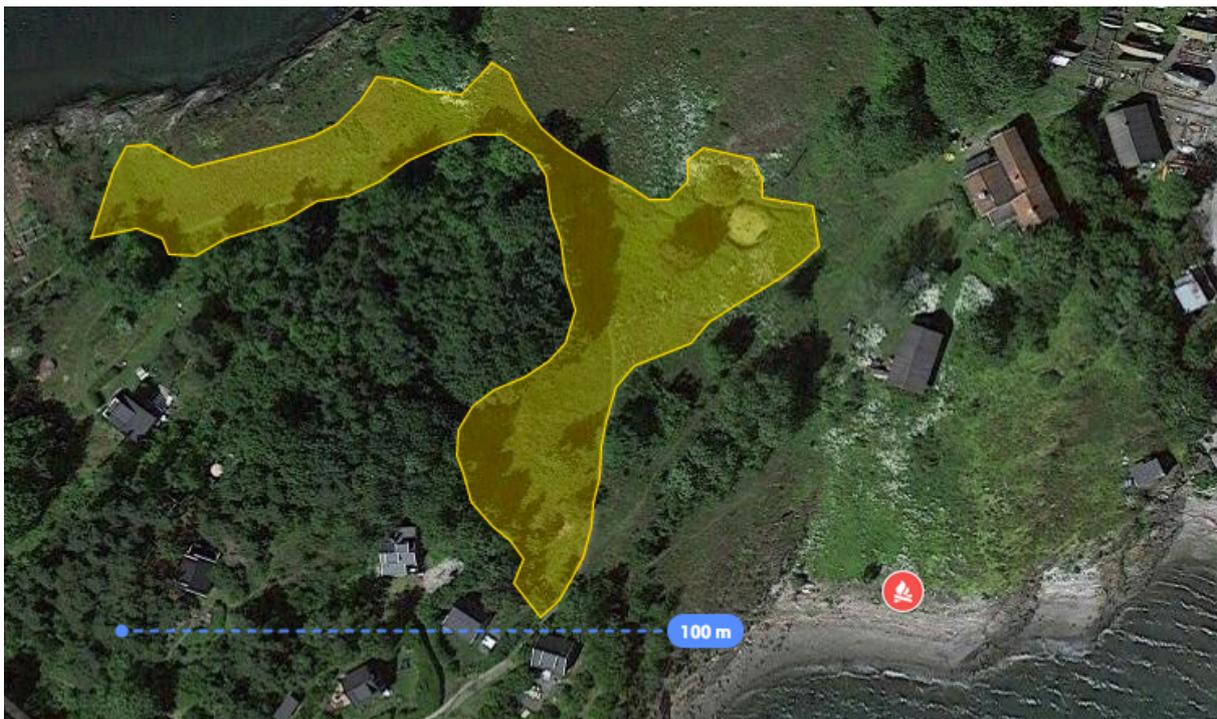

Contract – ”Skjøtsel av slåttemark innenfor Bleikøya naturreservat”

The main purpose of the work was to maintain the open nature of semi-natural meadow habitats. From the areas specified in the contract, the entire vegetation including the shoots of woods and shrubs was cut.

All this biomass, after drying, was raked and removed from the surface to the stack in NE of the island.

Some shrubs like: <Slåpetorn, hagtorn, geitved, svartmispel og asaler > have not been mowed, mainly on the edges of the meadows.

The following map and photographs illustrate the work done.

Map 1. The mown area is marked yellow. Place of biomass burning – marked red.

Photo 1. 23.08.2018. –before.

Photo 2. 10.09.2018. – ready.

Photo 3. 23.08.2018. – before.

Photo 4. 10.09.2018. -ready

Photo 5. 23.08.2018 – before.

Photo 6. 10.09.2018. –ready.

Photo 7. 10.09.2018 – the same area as photo 6 but from the top – ready.

Photo 8. 23.08.2018. – before.

Photo 9. 2.09.2018. –ready.

Photo 10. 23.08.2018. –before.

Photo 11. 3.09.2018. – ready.

Photo 12. 10.09.2018. The same area as photo 10,11. Bottom view – ready.

Photo 13. 10.09.2018. *Ononis arvensis* (Bukkebeinurt) preserved at the path.

Photo 14. 10.09.2018. Stack of collected biomass.

Photo 15. 28.09. 2018. Place after burning the stack.
